## SUPPLEMENTAL REPORTING OF MARKET VALUE ESTIMATES

[^0]:    Effective with the March 2005 cycle, the Sensitivity Measure is once again defined as the decline in the Pre-shock NPV ratio caused by either a 200 basis point increase or decrease in rates, whichever shock produces the larger decline in the NPV ratio. As a result of this change, the results for March and June 2005 may not be comparable to those from previous quarters.
    In the event that neither a -200 nor a +200 basis point change in rates produces a reduction in the NPV ratio, the institution is assigned a Sensitivity Measure of zero.
